CODED IMAGE

IMAGE

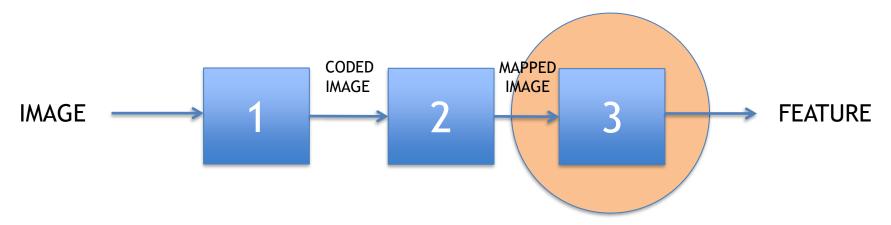

MAPPED

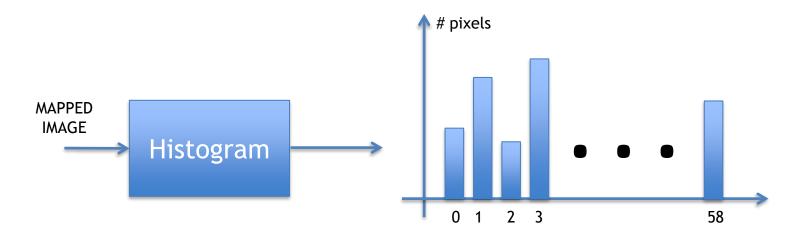

IMAGE

- 1. Coding
- 2. Mapping
- 3. Histogram

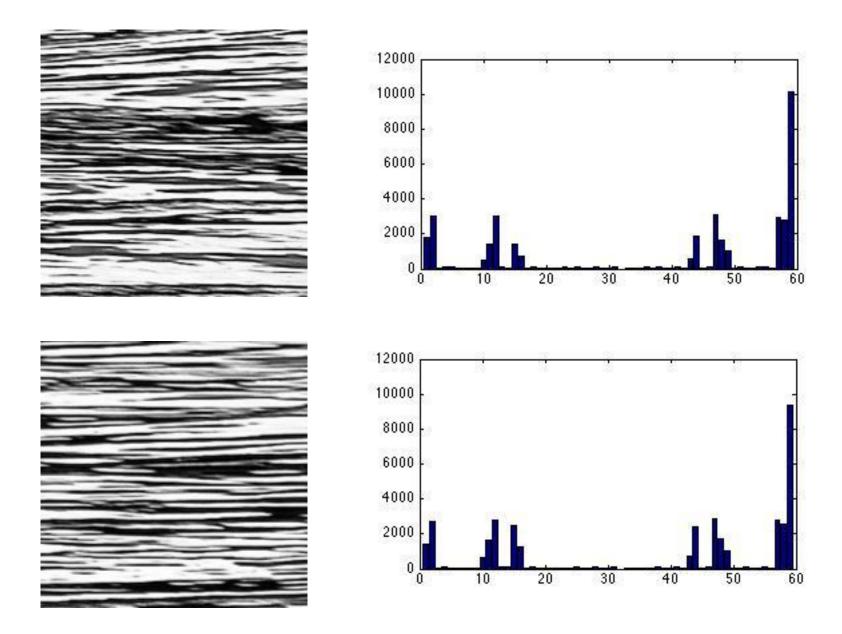

- 1. Coding
- 2. Mapping
- 3. Histogram

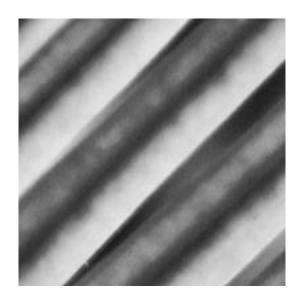

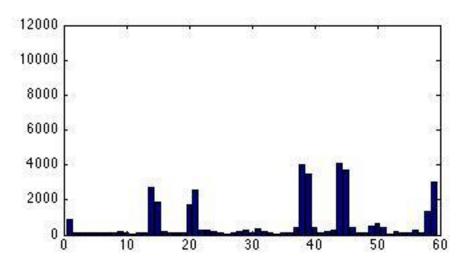

The image is described as a vector of 59 elements. Similar images have similar LBP features!!!

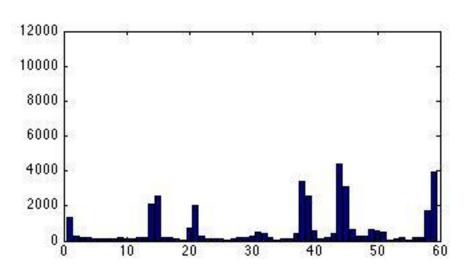

Examples
Texture Images

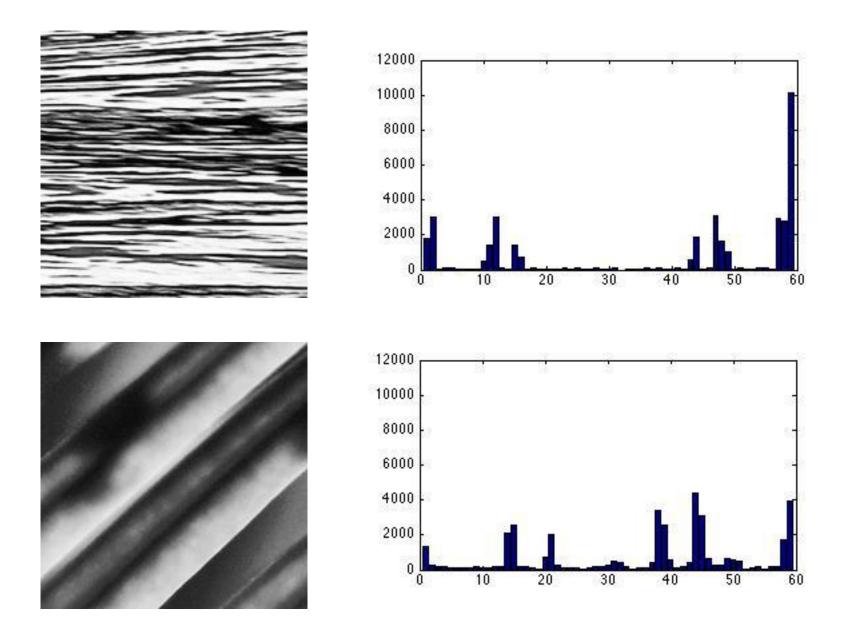

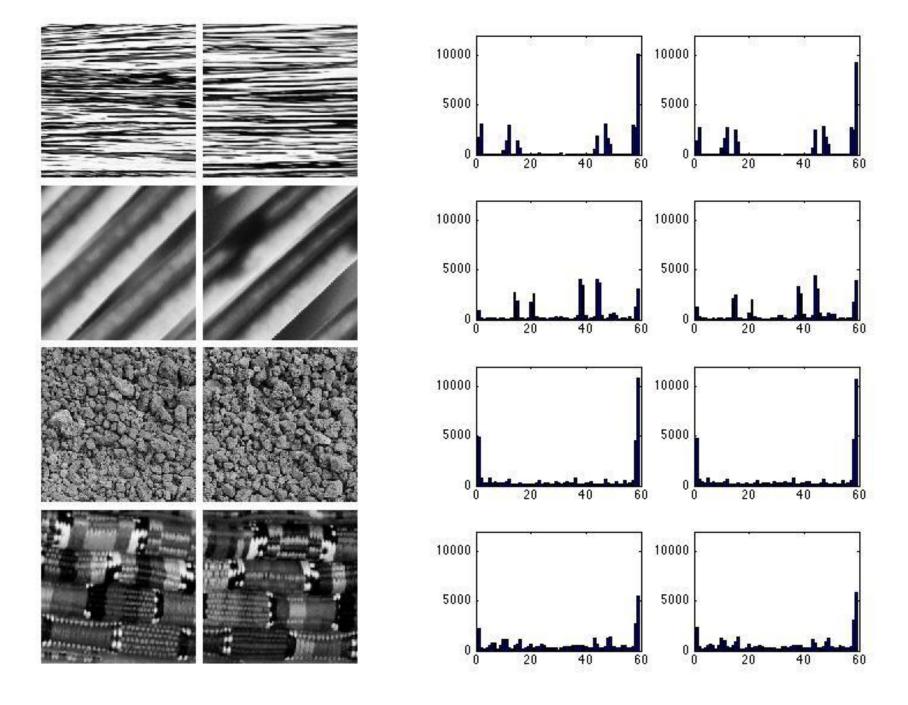

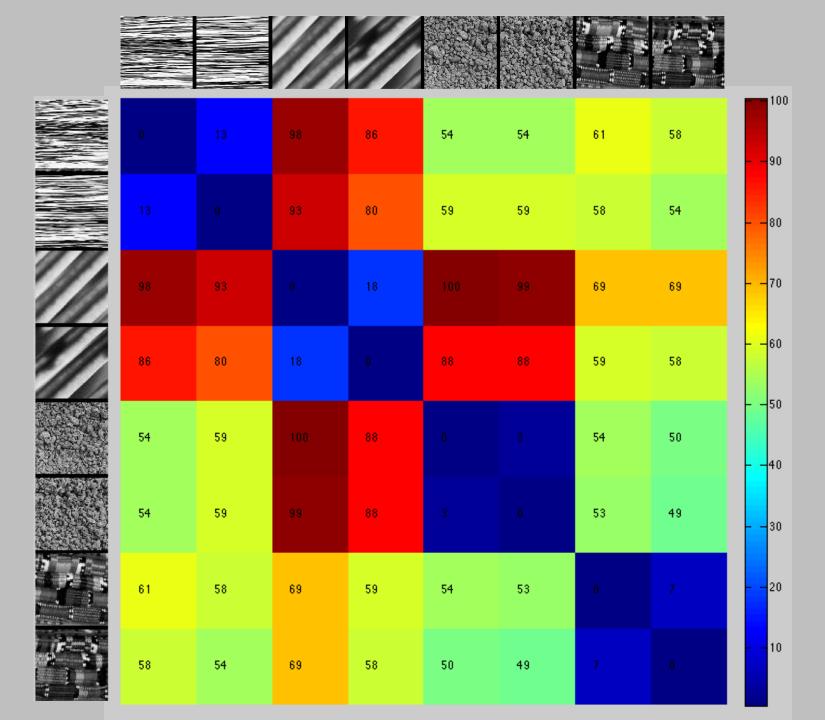

Examples Face Recognition

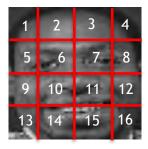

In the training set there are k classes.

For each class we have *n* training images.

In this example there are 40 classes with 9 images each.

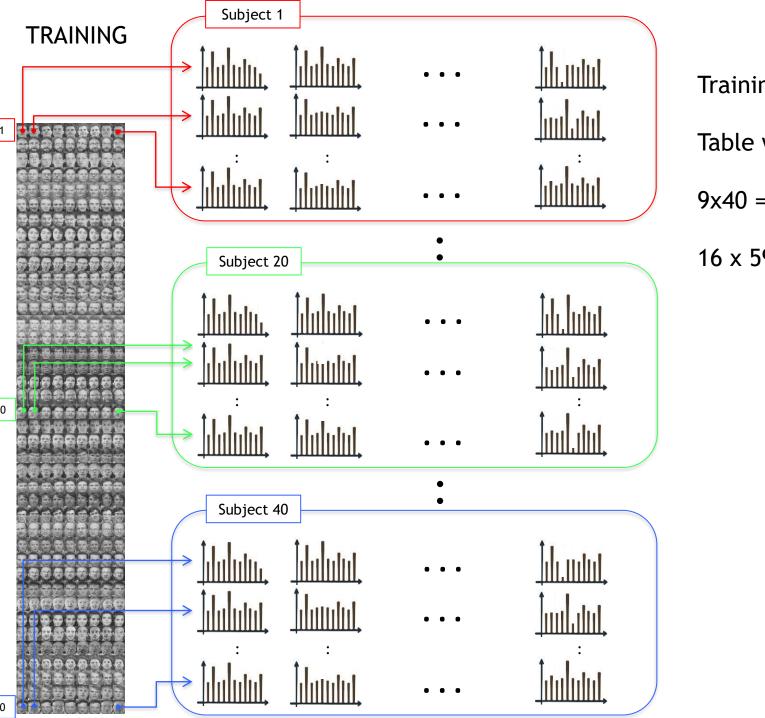

Each image we use w x w partitions

In each partition we extract LBP feature

A face is described using a feature of $16 \times 59 = 944$ elements

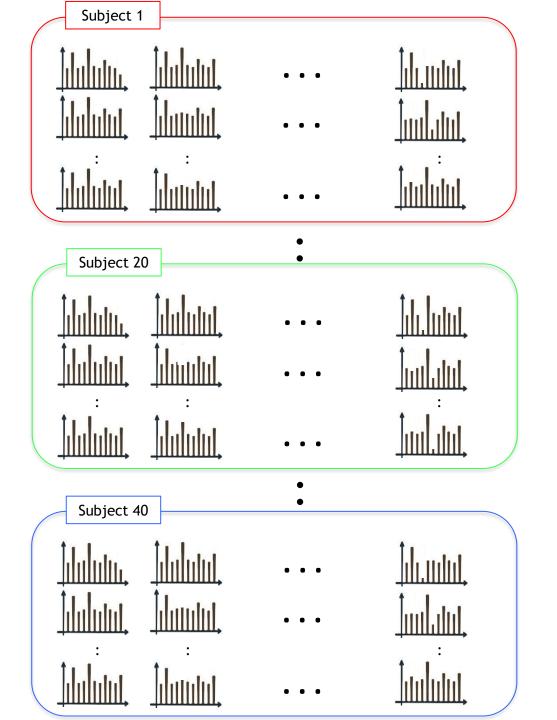

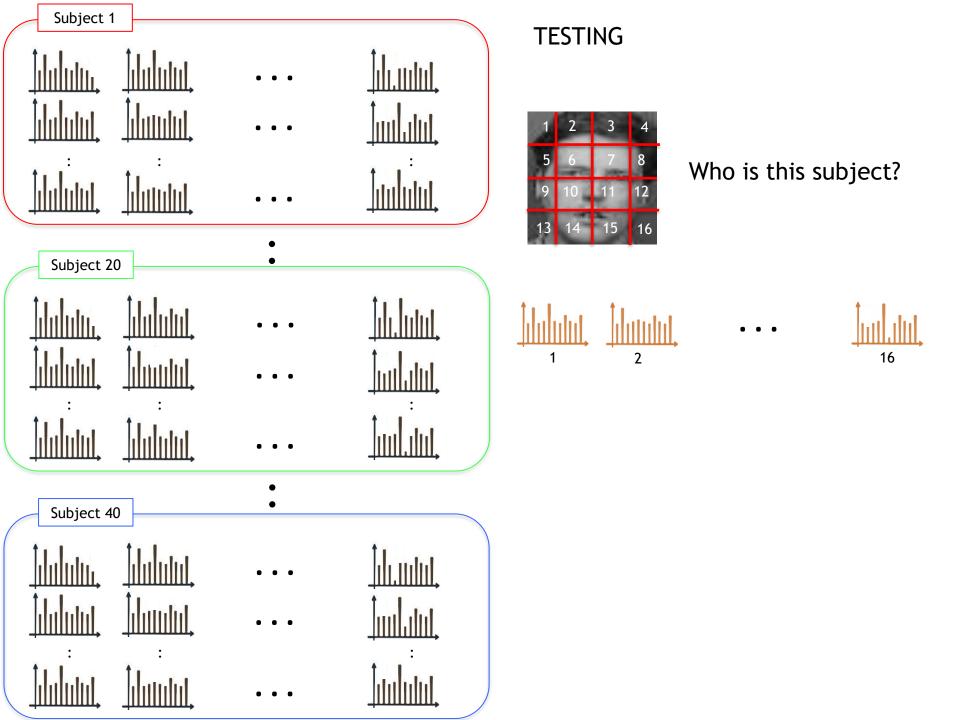

Training Data:

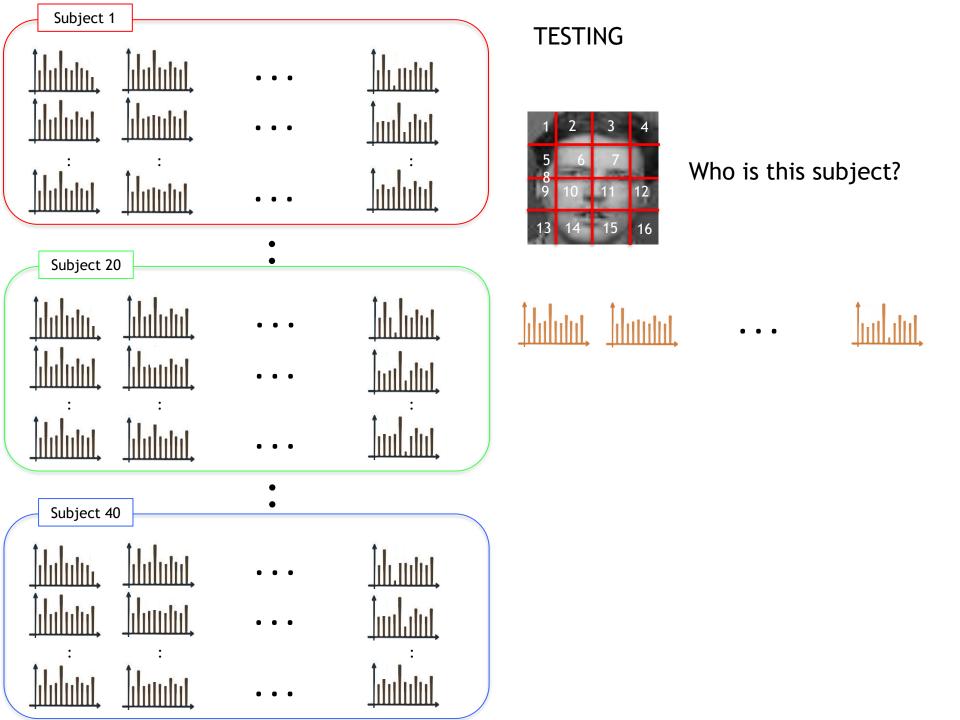

Table with:

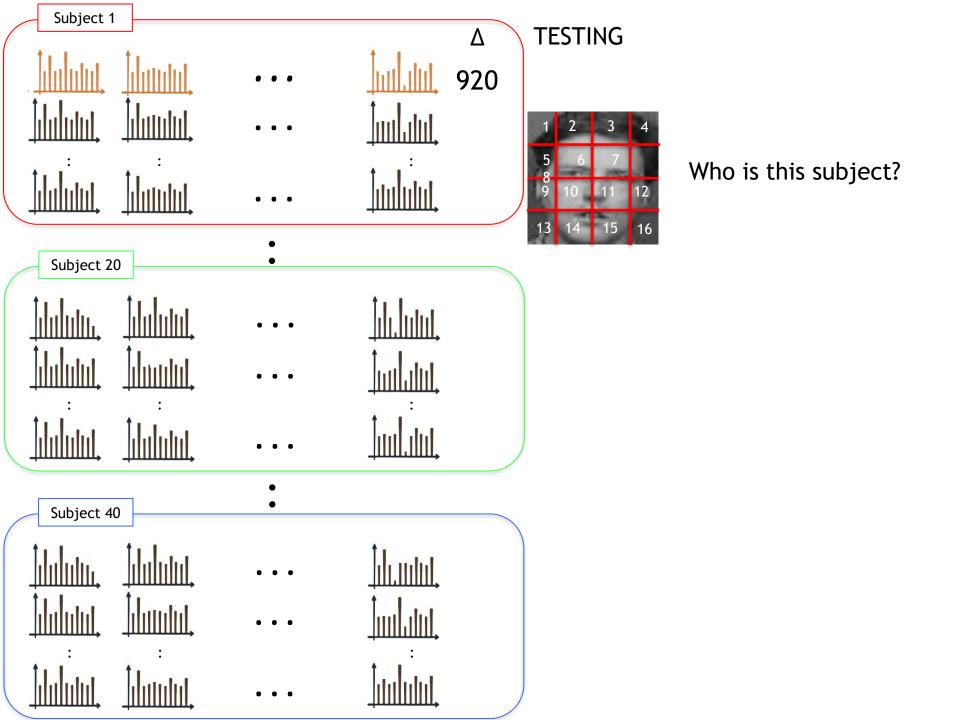

9x40 = 360 rows

 $16 \times 59 = 944 \text{ columns}$

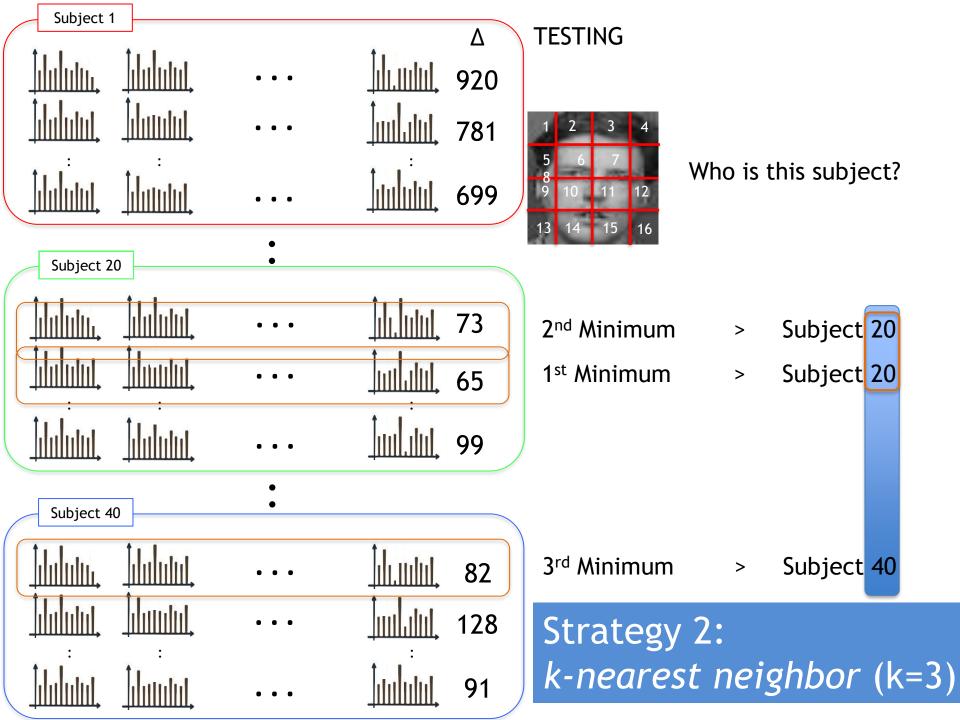

Strategy 2: k - nearest neighbors (knn)

Strategy 3: smallest sample-class distance
